

Project Demo Planning

OptiCrop — Smart Agricultural Production Optimization Engine

Demo Format

A 2-3 minute screen recording, uploaded as Unlisted on YouTube (or shared via Google Drive link), submitted alongside the GitHub repository link via the official submission form.

Demo Script Outline

- 0:00-0:20 — Brief verbal introduction: project name, problem being solved, and approach (ML-based crop recommendation).
- 0:20-0:50 — Show the Home page, navigate to About, briefly explain the model and accuracy achieved.
- 0:50-1:40 — Show the Find Your Crop page: enter a real soil/climate profile, submit, and show the correct prediction appearing.
- 1:40-2:10 — Briefly show the training notebook: the model comparison table and the confusion matrix, to demonstrate the rigor behind the deployed model.
- 2:10-2:30 — Closing: mention the GitHub repository link and summarize the project's value.

Recording Tooling

Windows built-in screen recorder (Win + Alt + R) or OBS Studio, recording the browser window while narrating.
