Empathy Map :

Empathy Map — Farmer Persona

SAYS "I never know which crop will actually grow well here." "Fertilizer is expensive — I can't afford to guess wrong." "My neighbor grew the wrong crop last season and lost money."	THINKS Is my soil even suitable for what I want to grow? Will the rains come on time this season? I wish there was a faster way to decide than asking around.
DOES Asks neighboring farmers and local dealers for advice. Follows traditional/regional crop choices by habit. Tests soil informally based on look and feel.	FEELS Anxious about financial risk from a wrong crop choice. Frustrated by lack of accessible, personalized guidance. Hopeful that better information could improve his harvest.

Pain points: financial loss from poor crop choice, no fast way to verify soil-crop fit, reliance on guesswork

A visual empathy map capturing what the primary user (a small/medium-scale farmer) says, thinks, does, and feels when faced with the crop-selection problem OptiCrop addresses.
